Hi AM :-)

Follow the instructions here to clean your system and restore normal function,

Dealing with Unwanted Spyware and Parasites:

<http://mvps.org/winhelp2002/unwanted.htm>

Be aware, there are many types of scumware that your antivirus and some removal tools cannot detect or remove. Therefore, use the programs as described in the instructions here. Some variants can continue to replicate themselves each time your computer starts up if not properly removed. Follow all instructions carefully. Some variants of spyware and malware can replicate themselves repeatedly if not properly removed.

Hope this helps.

Jan :)

Hi

I recently downloaded various games from different web sites and my IE 6 seems to have been hacked by some web sites. Whenever i open my IE 6, my home page is no longer there, instead it gives me this "privacy alert" thing saying that my computer has spyware, and being watched by others and gives me

Re: IE 6 hacked by unknown source

a link to download a software. This, to me clearly is scam to make me download their software. I tried to change my home page to other web site by going to "Internet option" in IE 6 and change to other default home page. But after i pressed "apply" and closed the IE 6, then when i reopen the IE 6 again, the same pages appears again, telling me to go and dowload this software. The home pages starts with "res://" can someone please help me to get rid of this page?

Thank you so much
Andrew
