Was running beta 2 fine, then uninstalled and installed beta 3.
Outlook 2003 with preview screen on. Hit the print button and error message:

Internet Explorer Scrit Error
Line 252
Char 1
Error Permission Denied
Code 0
URL res://ieframe.dll/preview.dlg

If I double click the message to open it, then the print button works. But I dont operate like that.

?

Craig Musgrove

Hello Craig
You have posted to IE6
IE7 beta are below as suggested here
<http://www.microsoft.com/windows/ie/ie7/default.msp>

Newsgroups here
