Downloaded screen savers from link as you suggested still no joy all I have is an additional heading for WindowsXP 3D screen savers but no photos

Assuming that the screensaver at the URL I posted was the one that used to run fine but now is not, it may be a result of corrupted video drivers or your video card.

Update your drivers via Device Manager in Control Panel, if no joy, still – contact your video card supplier for support.

Good luck!

Silj
