current when printing a website page, the current url of the site does not appear, but one from a previously visited site does What is causing this? I have cleared the cache, etc. but a url from a previously visited page DOES appear.

Check your printer settings. Something/someone may have hardcoded the one you are seeing... File, Page Setup... Header...

Hmm... what do you have in the Footer field? FWIW that's where I see the &u parameter.

please respond to gbeye@xxxxxxxxxxxxxxxxxx help greatly appreciated...
