From what website did you download this ActiveX Control?

Windows version? IE version?

I have downloaded an activex control (mfc dll) from a web site. It shows under "c:\windows\downloaded program files". I delete the activex control from "c:\windows\downloaded program files" successfully, it does give any error message. However, when I looked up the registry, some registry entries still remain. My question is, how can I ensure a complete uninstall of activex control?

Thanks,
