Hello,

I have not heard from you in a few days.

Do you still need further assistance from me?

If you have any other issues, please feel free to let me know. I am glad to be of assistance.

Have a nice weekend!

Thanks and regards,

Alex Zhang

| Hello,

| Thank you for posting here.

| I understand that you want to get a full version download about IE 6

Re: IE6 Download

SP1.

||

|| To perform a download-only installation from the Internet:

|| 1. On the following Internet Explorer download page, click the appropriate

|| language version to download the Ie6setup.exe file:

|| <http://www.microsoft.com/windows/ie/>

||

|| 2. Click Save to Disk (or Save), and then save the file in a folder on your

|| computer.

|| 3. Click Start, and then click Run.

|| 4. Click Browse, browse to the folder in which you saved the

Ie5setup.exe

|| file or Ie6setup.exe file, click to highlight the file, and then click

|| Open.

|| 5. In the Open box, click at the end of the command, add a space, and then

|| type the following command for Internet Explorer 5 or 6.

||

|| NOTE: Double quotation marks around the variable #e are required, because

|| #e designates the source path, including executable, of the Ie5setup.exe

|| or

|| Ie6setup.exe as appropriate.

|| /c:"ieXwzd.exe /d /s:""#E"

||

|| For example, if you saved the IE setup file (Ie5setup.exe or

Ie6setup.exe)

|| file in the C:\Windows Update Setup Files folder, the command looks like:

|| "C:\Windows Update Setup Files\ie5setup.exe" /c:"ie5wzd.exe /d /s:""#E"

||

|| The following is an explanation of the command line switches used:

|| " /d – Downloads Internet Explorer for the current platform only.

|| However,

|| if you would like to download all platforms, you can use the /d:1 switch

|| value to get all platforms. There are only two values for this switch, /d

|| and /d:1.

|| " /s:""<#e>" – Designates the source path of Ie5setup.exe. The ""<#e>""

|| value refers to the full path and name of the .exe file. Note that two

|| pairs of double quotation marks must surround the path.

|| 6. Press ENTER. Choose the appropriate items for the operating system.

||

|| For more information you may browse the following websites:

|| Download-Only Setup of Internet Explorer on Windows 2000 and Windows XP

|| <http://support.microsoft.com/?id=257249>

||
|| Downloading Internet Explorer for a Different Operating System
|| <http://support.microsoft.com/?id=174680>

||
|| For example, if you save the ie6setup.exe file to your drive F, the
|| following command line can download the full version of Internet
|| Explorer

|| 6
|| SP1:
|| "f:\ie6setup.exe" /c:"ie6wzd.exe /d /s:""#E"

|| If anything is unclear or you have any other related information,
|| please

|| feel free to let me know. I am glad to be of assistance.

|| Thanks and regards,

||
|| You can try a good PC/Software magazine. IE6SP1 is usually found in
|| its

||| cover CD.

|||

||| Or, you can ask someone with an internet connection to burn a CD for
| you.

||| Learn how to do it here:

|||

||| <http://www.broomeman.com/support/wsiedown.html>
