Hi there,

Scan your computer using the award winning Lavasoft Adaware software, please download from here (direct link):

<http://www.lavasoft.de/ms/index.htm>

After successfully installing the Ad-aware, please follow the steps below:

1. Double click the Ad-Aware icon on desktop.
2. Click "Check for Updates", "Connect" and download the latest pattern file if available. and click Finish
3. Click "Start" and then "Next"
4. After the scan is finished, click "Next"
5. Select all the items (checkboxes) or
(Right click on any object in the "Scan result" list and choose 'Select all objects')
6. Click Next and click OK to confirm removal.

If still no joy, try this work around:

1. Click Start, run, type "inetpl.cpl" (with out quotation marks) and click OK.
2. Click the Advanced tab.
3. Under Browsing, uncheck the "Enable third-party browser extensions (requires restart)" check box.
4. Click OK.
