Hi Don,

I should have stated that in my post.....sorry :-)) I did have it checked. I unchecked it, closed OE, rebooted, checked it again and still no preview. It was obviously something in the SP2 update. I wonder if I try to reinstall SP2 if it will let me without uninstalling it first. I installed from the free CD that I've had for 3mos.

Thanks,  
Spaz

Hi Spaz,

I guess I should ask the obvious question first:o)  
Are you sure you have a checkmark in the "Show Preview" checkbox in the Select Stationery dialog box:

It should be checked as in this screenshot:

If you already have a checkmark in this box, try unchecking it and close Outlook Express.  
Then reopen Outlook Express and put the checkmark back in.

Don
