Nothing has fixed it at all, not even temporarily. I tried everything you suggested (regsvr32.dll, changing font, deleting temp files). As to MS message file #318378 this refers to Microsoft XP, I'm using ME, although on Microsoft automatic update I got the new upgrade patches for OE and IE so everything should be up to date. Guess I'll have to now try all the spyware suggestions. If anything works I will indeed let you know. I'm wondering if all the suggested fixes worked for everyone else. Thanks again,  
Marcia
