I am having the same problem

>-----Original Message-----

>Need some help here please

>

>I have tried all the ways I could find to make OE the default run c:program

>files..... removing windows messaging, MS exchange ( way old

>versions 95& 97 ). Just did a registry search and found many keys for

>windows messaging and MS Exchange. Could these be the problem ? I think so,

>but I have no Idea what keys to change or delete. Is there a good utility

>any one knows of that will remove registry keys not being used. or does

>anyone know how to fix this. When I am in news groups and I right click on

>a message header, then click Forward, or forward as attachment I am asked

>what profile to use (MS Mail) then a screen pops up with saved logon info, I

>click ok and I get this message" Microsoft Mail postoffice could not be

>found on C:\programFiles\Outlook Express". I thought I got rid of MS Mail,

>but it seems to be reluctant to leave. I've been going nuts with this for

>awhile now. also OE is the default news reader, and the forwarding works

>fine with e-mails in OE.
