Thanks again, I'll try that tomorrow...

I had noted the space in the command line. BTW, what does this command do ?

Any idea where this problem comes from ?

It was working, and suddenly ( no install made, just closed OE and opened it again...) started behaving like this.

I tried the update from OE 5 (or 5.5 ?) to 6 to try curing the problem...

I hope the CWShredder will help...

Already made a AV scan and Spyware scan btw...

Seb
