Several possible causes and therefor several possible fixes:

1. Go to Start | Run and type

regsvr32 inetcomm.dll

and press <Enter>

If this doesn't work carry out step 6 and then repeat this step.

2. Go to Tools | Options | Read | Fonts and set Western (ISO) as the
default.

3. Clear Temporary Internet Files and the Temp folder.

4. Turn off email scanning in your anti-virus.

5. Someone else reported that re-installing OE using method 2 in this
article fixed the problem:

How to Reinstall or Repair Internet Explorer and Outlook Express in Windows
XP

<http://support.microsoft.com/?kbid=318378>

Method 2 works on earlier versions of Windows.

6. Eliminate any scumware.

See

Dealing with Unwanted Spyware, Parasites, Toolbars and Search Engines

<http://mvps.org/winhelp2002/unwanted.htm>

especially

<http://mvps.org/winhelp2002/unwanted.htm#Coolwebsearch>

Note that AdAware and SpyBot S & D will each catch some things the other
won't. Also, each needs to be updated before every use, even when just
downloaded. There's also a lot more to do than just those two programs.

CWShredder is also available here:

http://www.kellys-korner-xp.com/regs_edits/cwshredder.zip

**Post your HijackThis log to

<http://forums.spywareinfo.com/> or the Spyware forum at

microsoft.public.windows.inetexplorer.ie6_outlookexpress: Re: No Message

<http://forum.aumha.org/> for expert analysis, not here.**

Alternative download pages for Ad-Aware, Spybot, HijackThis and CWShredder may be found on this page:

<http://aumha.org/a/parasite.htm>.

If trying everything at that site does not fix the problem try step one (regsvr32 inetcomm.dll) again.
