Thanks. I'm not optimistic about getting a response from Yahoo but I'll try.

Do you think changing my dial up provider might solve this? Thanks.

> *Yep, I sure can. Now somebody is going to beat me about the head and shoulders because I took the cheap way out, and changed the destination sever TCP port to 24 instead of 25. Well, I could have set a rule in my firewall to block TCP port 25, but the error would be different.*

>

> *The issue is with your dial-up provider; they are not letting you reach the Yahoo! mail server because they are blocking port 25 out. Your best bet is to try and convince Yahoo!, as a paying customer, to implement RFC 2476 email submission servers using SMTP AUTH and TCP port 587. (If you had a local firewall blocking port 25 access, the error would be different.)*

>

> *I'd try, but I only have a free Yahoo! account, and my ISP, SBC Yahoo! DSL Service, expects me to use port 25 with 'smtp.pacbell.yahoo.com'. I have no traction to get them to consider RFC 2476.*
