Don't confuse a folder with a DBX file.

Folders.dbx should just be considered an administrative file (ignore the name) but it must be included in the backup/import set for all to import correctly.

Thanks for the feedback & YW.

Hi Pa Bear,

Thanks for all the Info's but I still cannot do about it. Can you give
me a simple answer maybe one step at a time.

I already have a folder named friends.dbx and it is (not) Read Only.

Tell me what should I do now? How I can make this 2nd OE-6 read

friends.dbx?

Rino
