"Outlook Express could not be started because MSOE.DLL could not be loaded"

I am running Windows XP Pro with SP2 installed. When I created a new user account, I get this error message (above) when trying to open OE. OE still works in the other profile. I have made sure the shortcut is correct, and I have uninstalled and reinstalled OE. I have tried to search the KB, but there are no articles related to this error message AND Windows XP. Any help would be appreciated.

Have A Good One,
Sandy
