Create a new Identity.

If that works, setup your subscribed newsgroups.

In OE, View, Layout, check Folder List.

Look at the Folder List to find out which newsgroups go with each server.

Open a create message window.

Make a list of names using the directions for below.

Save the message as an eml file.

Clicking on each link will start that newsgroup.

You could also create the list in Word.

Ron Sommer

Unfortunately the subscribed newsgroups do not import or export. Having a list of newsgroup links would be one way to maintain a backup. These could be created manually by pasting information obtained in a newsgroups properties into Notepad, keeping the name of the newsgroup and combining it with the server part of a link. Not easy, but not as onerous as it might seem.

For this server

<news://msnews.microsoft.com/>

Information from this group's properties

C:\Documents and Settings\Tim K\Local Settings\Application Data\Identities\{long number}\Microsoft\Outlook Express\microsoft.public.windows.inetexplorer.ie6_outlookexpress.dbx

Name of the group combined with the server to make a news link

news://msnews.microsoft.com/microsoft.public.windows.inetexplorer.ie6_outlookexpress

Short link that can be used after the groups list is downloaded

news:microsoft.public.windows.inetexplorer.ie6_outlookexpress

Re: Attachment Setting *

The links can be used in the Start, Run box or IE address box — to mention two ways.

Just a query.

OE is 6.0.3790.1830 (srv03_sp1_rtm) and is used strictly only as a newsreader. When in Tools\Options\Security all is checked as far as not allowing attachments any post that has an attachment is not blocked. Now this does not bother me since I do not touch any but I am just curious as to why the settings do not seem to hold. This was not the case before I re-activated this server due to a MOBO Upgrade. But since the Activation these settings as I mentioned above do not hold and do not implement. Again it does not bother me but I would like to find a solution so as I would also like to know for the future.
