Thank you Steve for your interesting input!

I just checked it up and noticed that this first square "Mail" was already enabled...and this must have been activated for many months by now! So this could have been possibly the cause of making my OE "flaky" (as you stated) by producing huge logfiles (for sure); ha!?

Hence, I disabled it now and made an immediate new test...but...

Steve, could you please tell me now WHERE those logfiles are being automatically stored, so that I could check them up for possible hints?

Thanks!

Philippe B.
