I am talking about OE. There is nothing I do to generate that error. I get that msg when I first open OE.

"Steve Cochran" <[scochran@xxxxxxxxxxx](mailto:scochran@xxxxxxxxxxx)> wrote in message <news:692F963F-DE7C-497F-A5F1-A54F4B8997A2@xxxxxxxxxxxxxxxxxxx>

I have no idea what service you are talking about. What do you do to generate the error?

steve

Hi Steve

I hope you can help me with an additional problem that I get. Often it says "This service does not work with Outlook Express". How can I correct the problem?

Thanks

"Steve Cochran" <[scochran@xxxxxxxxxxx](mailto:scochran@xxxxxxxxxxx)> wrote in message <news:0ADE0640-FBB1-472E-A847-7D3FDA7ECE81@xxxxxxxxxxxxxxxxxxx>

It has nothing to do with the location of the message. The language attribute is set to show which language the parser should use. Javascript is the default. See

<http://msdn.microsoft.com/workshop/author/dhtml/reference/properties/language.asp>

I think Jim was just complaining about the script being their to begin with.

I think Jim is referring to the script language  
in Ken's reply:

```
<SCRIPT language=javascript>  
if (!ccTest('DH_FREE'))  
document.write("<style>span.cc603622  
{display:inline!important}</style>");  
else document.write("<style>span.cc603622  
{display:none!important}</style>");  
</SCRIPT>
```

The script language is not needed in a  
newsgroup message.

Hi Jim

I am interested in knowing  
why scripting is bad. If it is,  
I need to  
ensure that it is disabled on  
my computer.  
Thanks

Ken:

Please stop  
using that  
scripting  
example to  
post. You  
can take the  
text from  
any article  
and paste it  
into  
Notepad,  
then from

Re: Unable to configure OE

there into  
your  
message.  
Scripting is  
disabled on  
many  
computers  
these days  
and  
all your  
reply does  
is throw up  
"scripting  
errors."  
HTML is  
really  
not needed  
for posting  
that  
information.  
Thanks.

Microsoft  
Outlook  
Express  
To protect  
our users  
from the  
increasing  
amount of  
unsolicited  
junk  
e-mail and  
spam sent  
from MSN  
Hotmail  
accounts  
through  
Outlook and  
Outlook  
Express, we  
have  
reluctantly  
had to  
restrict the  
new use of  
Outlook and  
Outlook  
Express to  
subscribers.  
You can  
view your  
Hotmail  
messages in  
Outlook  
Express 6.

---

1.. In  
Outlook  
Express,  
click the  
Tools  
menu, and  
then click  
Accounts.  
2.. Click  
Add, and  
then click  
Mail.  
3.. Type  
your full  
name, and

Re: Unable to configure OE

then click  
Next.  
4.. Type  
your full  
Hotmail  
e-mail  
address  
(name@xxxxxxxxxxxxx),  
and  
then click  
Next.  
5.. In the
