With Steve's suggestion, I was successful in disabling the mandatory longon window at each startup. However, after going thru all the suggestions in this post, I still do not have email images from trusted sites. Even uninstalled/reinstalled OE and .NET Framework. Still not there. Oh well, thanks for the tips and I see my Yahoo web mail still has html graphics.

If one goes to Windows Update and gets SP1 for the .NET framework 1.1 then that fixes those issues.

Looking thru my PC log, I see I downloaded and installed .NET Framework which was a required component of one of those MS Power Toys. Was about that time my OE went wonky with the missing graphics. Also, my PC now INSISTS I login at each bootup where before, everything loaded without my intervention. I'm on a standalone desktop and have no need for any network settings and now wonder if there's some underlying security settings in that .NET Framework file?

Steve,

Re: images blocked

Yes, I've tried all those settings in the Security TAB numerous times, but thanks anyway.

Oh, I see. Was buried under those carats and thought part of a previous post. The only thing without a carat was the 'news' item under my signature.

So you suggested the Tool > Options & uncheck the HTML content box? Yes, I've been thru those menus over and over again. Every button and every TAB.

There's some other underlying cause of this I'm pretty sure and Bruce sent me numerous links to articles that may be the root cause of all this but it'll take me some time to work thru it all.

Frank,  
can't  
see  
to  
find  
that  
article  
via  
MS  
or  
Google.  
Any  
add'l  
info  
avbl  
on  
that  
thread  
?

What  
article?  
I gave you  
something  
to try.  
Did you try  
it?

I  
installed  
cable  
broadband

last  
week  
and

ever  
since,  
all

my  
email  
messages

have  
been  
stripped

of  
the  
html  
graphics.

I  
subscribe  
to  
numerous  
trusted  
sites  
i.e.  
Amazon.com,  
Buy.com,  
Cnet.com  
etc.

and  
now  
only  
get  
text  
messages  
accompanied

by  
those  
little  
boxes  
with  
the  
red  
'x'

Re: images blocked

in  
them.

Have  
confirmed  
all  
the  
Security  
settings  
as  
described  
here  
and  
elsewhere.  
Plus,  
the  
option  
View

in  
HTML  
is  
now  
grayed  
out.

My  
ISP,  
Comcast  
cable,  
insists  
they  
installed  
no  
software  
that  
would  
disable  
this  
feature  
yet  
I  
had  
no  
problems  
for  
years  
on  
my  
clunky
