I was just thinking how wonderful life was, when "Bruce Hagen" <Nospam@xxxxxxxxxxxxxxxx> opened his gob and said:

Well, if you are typing normal words with spaces between them, it should go to the next line when you reach the edge of the window

Hi Bruce,

Many thanks for getting back to me so quickly.

The above was it!

I was testing something and must have been using a continuous line of text and panicked. It was very concerning that the other two PCs on my LAN behaved the same way (even though OE is not used).
