Any good news client (but not MS Outlook Express) can find a message by searching on the Message-ID string, so it is usually a good idea to include that when you refer to another post.

Well, OE indeed can't but IE (Internet Explorer) can tell OE to display the article. I.e. putting this

<news:1kw9z3llqlnr6.dlg@xxxxxxxxxxxxxxxxxxxx>

in the "Address" field of \*IE\* and pressing Return will cause \*OE\* to display your article.
