Hi

I'm running Windows NT Professional 2000 Version 5.0 built 2195: service pack 4.

Physical memory 260.848kb

Zonealarm Free version #7.0.337.000

I uninstalled AVG several weeks ago as I was having the same problem, receive but not send.

I'm wondering if I should change to XP ?

Please state your Windows version.

Are you running ZA Free or Pro?

Have you uninstalled AVG Free Anti-Virus?

I have some ideas but I need your answers to the above first.

PA Bear:

I have disabled Norton E-mail scanning and wasn't sure on Zonealarm so I closed the program down. Tried to send e-mail to 2 different people and niether one would go ,ERROR:

A time-out occurred while communicating with the server. Account: 'hutch309.2.', Server: 'pop.netzero.com', Protocol: POP3, Port: 110, Secure(SSL): No, Error Number: 0x800CCC19

I have the time out set at 2 mins:

Outgoing set at authsmtp.netzero.com

Would I be better to delete Outlook Express 6 and start all over?

...If I remove
ZoneAlarm & Norton what happens to my
protection when I'm on the net?

Norton (AntiVirus): You needn't uninstall NAV, just disable
it's Email
Protection. It in fact provides no /additional/ protection and
even
Symantec says it's not necessary:

<QP>

Disabling Email Scanning does not leave you unprotected
against viruses
that are distributed as email attachments. Norton AntiVirus
Auto-Protect
scans incoming files as they are saved to your hard drive,
including
email
and email attachments. Email Scanning is just another layer
on top of
this. To make sure that Auto-Protect is providing the
maximum protection,
keep Auto-Protect enabled and run LiveUpdate regularly to
ensure that you
have the most recent virus definitions.

</QP>

<http://service1.symantec.com/SUPPORT/nav.nsf/docid/2002111812533106>

ZA: Assuming you're running ZA Free and that you do NOT
have Norton
Internet Security of Norton 360 installed, you can (1) disable
or
uninstall ZA Free, (2) enable the Windows Firewall and then
(3) see if
things improve.

Hi Pa Bear:

Re: Outlook Express 6

I do have Platinum and HiSpeed 3G account? and I just upgraded to DSL, but this started long before DSL. Secondly, I had the same problem when I was using Free AVG. If I remove ZoneAlarm & Norton what happens to my protection when I'm on the net? and also when I am upgrading them with new updates? Should I take out one at a time? and which one first? I await your reply.

<QP>

Important note for Free NetZero members: To take advantage of offline email clients such as Microsoft Outlook [and Outlook Express], you must upgrade to a Platinum or HiSpeed 3G account.

</QP>

Have you upgraded to a Platinum or HiSpeed 3G account?
