Mail gets downloaded into whatever mail program you run. When using a POP3 mail server, by default all messages are deleted from the server after downloading, leaving nothing for another mail program to get.

You need to do any ONE of the following:

- Stop running Outlook Express
- Run OE in a news-only mode

Command Line Options for Outlook Express

<http://support.microsoft.com/?kbid=177233>

- Remove the mail account in OE (Tools, Accounts, Mail)
- Tell OE not to download mail (Tools, Accounts, Mail, Properties, General - uncheck the include this account in send and receive)
- Tell OE to leave messages on the server (Tools, Accounts, Mail, Properties, Advanced)

I just upgraded to Microsoft Office Outlook 2007, but I'm still receiving my emails in OE I can send emails okay in MOO, but I don't know what to do to get the messages received in MOO.

Any Help Is Appreciated.

Thanks, GM
