It sounds like when you were at the download site, you had the choice of Run or Save and you saved it to the Desktop. If you click on the icon now does it give you the option to install? If so, close all other programs and do it.

Hey Larry ,.

I had the same problem with my new laptop ,.. no spell check. i have installed it from the site you gave before.. and i have it on my desktop.. but not in my outlook express in my email... can you help me out ...please.

Beth

You would need to have MS Office installed to get a spellchecker. However you can install a free one that woprks very well. I have used it for several years. Download it from here.
