Thanks again. But how is a Print Screen going to save individual names and email addresses when only the name will show on the screen?

"Bruce Hagen" <Nospam@xxxxxxxxxxxxx> wrote in message news:OpKZcU0UIHA.6060@xxxxxxxxxxxxxxxxxxxxxxxxxxxxx

This may be a little crude, but how about a Print Screen? To make it easier, download this freeware program.

PrintKey:

<http://www.freewareweb.com/cgi-bin/archive.cgi?ID=292>

With this tool, you hit Print Screen on your keyboard and then Rectangle will let you outline only what you want to save easily. Then Save it to a folder.

You can also raise your screen resolution temporarily to get more in the screen capture.

Ron, thank you. However, this does not allow me to copy those addresses in my specific Group that do not also appear in my Address Book. I want to copy all addresses in the Group (apx 100). Those in my AB I can copy. Appreciatively, Fran

Re: How to save or export group contacts who are not members in Main

Addresses, View, check Folders and Groups.
Highlight the group in the Folders and Groups (left) pane.
Highlight the names in the right pane, Copy.

Bruce, thanks for your reply. However, OE will not let me copy these names in my Group. I click on Addresses>Group>One name in group>right click>copy and when I right click & paste into Notepad...nothing. Is there another way to "save" this Group.
Fran

I print Groups like this, but the names are in the address book as well. You will have to try it to see if it works.

Open the group and highlight all the addresses | Right click and Copy.

If you Paste into Notepad or any word processing program, the addresses will all be on the left side of the page and use up a lot of paper. I have Word Perfect. If I widen the left and right margins to .5 and the select Format and choose three columns, when I Paste Special, the whole page is used as the addresses are in all three columns.

Re: How to save or export group contacts who are not members in Main

Use the Two Side option
when printing to save even
more paper.

Is there a
way for me
to somehow
save and/or
export to a
text file
contacts
(including
their email
addresses)
within a
group
(under Main
Identity's)
that are not
members
individually
in my Main
Identity's
contact list?
All
help is
appreciated.
Thank you
in advance.
Fran
