Perhaps I want to much;here is my goal:

- 1-I have xp sp2 and use Comcast web based server as my regular mail.
- 2-I use my Hotmail account for most web/secondary contacts.
- 3-I wish to use hotmail for my newsgroups

Re: mail service confusion

4—Under programs in internet options, I see that I can choose hotmail under ail but under news there is only outlook express.

OX is not a secure program and I'd prefer not to use it. Btw, I have tried multiple times to set up accounts via ox but it never works out.

I gave my email address in newsgroups as my Hotmail one.

Problem is that on occasions when I get notifications from newsgroups, I have to go to newsgroups and search for it. 60% of the time when I click on the notification from newsgroups in Hotmail, does it take me to the relevant post.

Is it possible to have the regular mail thru Comcast, secondary mail via Hotmail and newsgroups thru Hotmail Live?

Grampy Pete
