Milo

I have the 578.uk version of the same media center and I have already ditched it !

I had been planning the purchase for some time and finally afforded the machine. I last 3 days in the living room.

TV quite plaining sucks ! ghosting etc etc etc I have searched for fixes and improvements. Live TV pic quality is terrible so you can only imagine how bad recordings are at lower levels.

I am afraid to say my media center is just a PC now and I have a new DVD recorder in the living room.

Frankly I feel totally ripped off by MS :

1. the info on the site paints it to be the be all and end of living room entertainment – it is not i can not even do TV right.
2. AND THIS IS THE WORST BIT – the media clips they use in the store demos (and on set up) are unreal quality – and you think that is what it is going to be like quality wise.

If I want the sensation of watching TV through a dirty window the media center is the most expensive way of doing it imho.
