Hi,

I am currently in the process of ripping all of my (original) audio CDs onto my Media Center PC and as the process takes a while, watching Live TV at the same time. Whilst watching Live TV, when you insert a CD you are giving the option to 'Play CD' or 'Close' through a pop up.

Now what would be really useful at times like these would be to have the option 'Copy CD' available if the CD just put into the drive has not already been transferred to the PC, so that the content can be transferred as a background process.

Stu...

.
