Jenelle,

During this trace the PC was connected with a patch cable to a Linksys WRT55AG router, XBOX360 was connected to the router using wireless "A" sitting 5 feet from the router/pc. I have directly connected the PC and xbox together and had the same results. I am at work and do not have access to the Sony PC so I can not find out any specifics on the NIC but it is built into the PC and it is an Intel card (I remember looking for driver updates for it just to see if that would help resolve this issue - I had the latest driver installed)...when I get home I will check and post specifics. Symantec is the 2006 Internet Security so it has the whole suite of items, like IDS, Privacy, Firewall, and Virus. I disabled all of them other than virus which you can not disable.

Thanks,

Bill

Bill,

I am looking at your trace today and have a couple questions for you.

Was the PC directly connected to the Xbox during this trace?

What type of network card is installed in the Sony Viao PC?

Are there any messages being reported to the event viewer during your setup attempt?

Are you using the Norton Internet Security Firewall or do you have other Internet Security Suite items installed?

Thanks

Re: "Invalid Connection Data" Message XBOX 360 acting as an MCE

Todd,

The capture using netcap has been sent.

Thanks,

Bill

"Todd Bowra [MSFT]" wrote:

The network trace appears to be garbled. Could you capture a new trace using Netcap? (my current favorite tool for such things). Steps:

1) Install the Windows XP Service Pack 2 Support Tools from the following

link

<http://www.microsoft.com/downloads/details.aspx?FamilyId=49AE8576-9BB9-4126-9761->

2) Once installed, open a cmd window and change active directory to the Support Tools directory

3) Start the network capture using "netcap.exe". The /n: parameter specifies

which network interface should be monitored. To discover the network

interfaces on your machine type "netcap /?" The interfaces will be listed

at

the end to the executables help details.

... Example: C:\Program Files\Support Tools>netcap /n:1

4) Conduct the steps to reproduce the problem you are seeing (attempt to

get connected). Once complete return back to the command window and hit

the

space

bar.

5) E-mail the trace to the same address (msft_mcx at hotmail) and post

back

here once you've done so

thanks,.

Todd

Todd,

Did you receive the 2 emails I sent
you...packet capture and
DvcConn.logg
file?

Thanks,

Bill

"Todd Bowra [MSFT]" wrote:

Please post the contents of
your DvcConn.log file from
c:\windows
here.

Also, please e-mail your
network capture to
msft_mcx at hotmail and
post
back here once you've done
so.

Todd,

I have
Norton

Re: "Invalid Connection Data" Message XBOX 360 acting as an MCE

Internet
Security
2006, I have
opened all
the ports I

have

found in the
various kb
articles such
as 911728
and
followed
the

instructions

found on
Symantecs
website
from top to
bottom. I
have also
disabled

all

aspects of it
on many
occasions.

I have
opened
ports on the
Linksys
router and
taken it out
of play
by

direct

connection
of the PC
and XBOX.
Still the
same
thing...I get
the

Re: "Invalid Connection Data" Message XBOX 360 acting as an MCE

"Invalid

Connection
Data"
Message on
the XBOX
360 when I
try to
connect.
What

I

find

interesting
is everytime
I boot up
my
computer I
get a
notification
in

the

tray in the
lower right
hand corner
asking me if
I would like
to
make

a

connection
to the new
XBOX 360
it has
found!!!

I have
followed
the steps in
KB911739
many
times...for a
while I
had

Re: "Invalid Connection Data" Message XBOX 360 acting as an MCE

to go

through the
process in
the article
just to get
the XBOX
to not blow

past

the

8 digit code
after getting
the "Invalid
Connection
Data"
Message.

After I

deleted the
entry under
device table
(one time
only) in the
registry

it

stopped
blowing by
the 8 digit
code but for
each and
everything I
try

I go

back
through the
steps in
KB911739
to ensure
nothing is
left to

chance.

Re: "Invalid Connection Data" Message XBOX 360 acting as an MCE

I have a
packet
capture
available
that I
attempted to
email to
you...I

took

a guess at
your email
address so
who knows
if you will
get the
email.

Here is the
info from
the registry:

Windows
Registry

Do
you
have
any
third-party
firewall,
intrusion
detection,

anti-virus,

privacy
guard,
or
parental
control
software
installed
on
your
PC?

–
Have
you
tried
all
of
the
steps
outlined
the
following
kb
article?

<http://support.microsoft.com/kb/911739>

If
you
answer
is
no
to
the
first
question
and
yes
to
the
second
