Hi Bill.

In addition to Jenelle's suggestions, you might want to look into getting updated drivers for your network card.

They are available at

<http://support.intel.com/support/network/sb/CS-006120.htm>

Jenelle,

The NIC is an Intel(R) PRO/1000 MT built into teh PC.

Application Event Viewer had this Event:

Event Type: Warning

Event Source: Media Center Extender Services

Event Category: None

Event ID: 37424

Date: 5/22/2006

Time: 11:12:57 PM

User: N/A

Computer: BILL

Description:

ERROR: KeyExch RQ 3 – Device {00000000-0000-0000-0200-00125A7EF641} –

Re: "Invalid Connection Data" Message XBOX 360 acting as an MCE

There was an error processing this request. Error code 0x80004005.

Thanks,

Bill

Bill,
I am looking at your trace today and have a couple questions for you.
Was the PC directly connected to the Xbox during this trace?
What type of network card is installed in the Sony Viao PC?
Are there any messages being reported to the event viewer during your setup attempt?
Are you using the Norton Internet Security Firewall or do you have other Internate Security Suite items installed?

Thanks

Todd,

The capture using netcap has been sent.

Thanks,

Bill

"Todd Bowra [MSFT]" wrote:

The network trace appears to be garbled.
Could you capture a new trace using Netcap? (my current favorite tool for such things). Steps:

1) Install the Windows XP Service Pack 2 Support Tools from the following

Re: "Invalid Connection Data" Message XBOX 360 acting as an MCE

link

<http://www.microsoft.com/downloads/details.aspx?FamilyId=49AE8576-9BB9-4126>

2) Once installed, open a cmd window and change active directory to the

Support Tools directory

3) Start the network capture using "netcap.exe". The /n: parameter specifies

which network interface should be monitored. To discover the network interfaces on your machine type "netcap /?"

The interfaces will be listed

at

the end to the executables help details.

... Example: C:\Program Files\ Support Tools>netcap /n:1

4) Conduct the steps to reproduce the problem you are seeing (attempt to

get connected). Once complete return back to the command window and

hit

the

space

bar.

5) E-mail the trace to the same address (msft_mcx at hotmail) and post

back

here once you've done so

thanks,.

Todd

Re: "Invalid Connection Data" Message XBOX 360 acting as an MCE

Todd,

I
have
Norton
Internet
Security
2006,
I
have
opened
all
the
ports
I

have

found
in
the
various
kb
articles
such
as
911728
and
followed
the

instructions

found
on
Symantecs
website
from
top
to
bottom.
I
have
also
disabled

all

aspects
of
it

Re: "Invalid Connection Data" Message XBOX 360 acting as an MCE

on
many
occasions.

I
have
opened
ports
on
the
Linksys
router
and
taken
it
out
of
play
by

direct

connection
of
the
PC
and
XBOX.
Still
the
same
thing...I
get
the

"Invalid

Connection
Data"
Message
on
the
XBOX
360
when
I
try
to
connect.
What

Re: "Invalid Connection Data" Message XBOX 360 acting as an MCE

I

find

interesting
is
everytime
I
boot
up
my
computer
I
get
a
notification
in

the

tray
in
the
lower
right
hand
corner
asking
me
if
I
would
like
to
make

a

connection
to
the
new
XBOX
360
it
has
found!!!

I
have
followed

Re: "Invalid Connection Data" Message XBOX 360 acting as an MCE

the
steps
in
KB911739
many
times...for
a
while
I
had

to go

through
the
process
in
the
article
just
to
get
the
XBOX
to
not
blow

past

the

8
digit
code
after
getting
the
"Invalid
Connection
Data"
Message.

After I

deleted
the
entry
under
device
table

Re: "Invalid Connection Data" Message XBOX 360 acting as an MCE

(one
time
only)
in
the
registry

it

stopped
blowing
by
the
8
digit
code
but
for
each
and
everything
I
try

I go

back
through
the
steps
in
KB911739
to
ensure
nothing
is
left
to

chance.

I
have
a
packet
capture
available
that
I
attempted

Re: "Invalid Connection Data" Message XBOX 360 acting as an MCE

to
email
to
you...I

took

a
guess
at
your
email
address
so
who
knows
if
you
will
get
the
email.

Here
is
the
info
from
the
registry:

Windows
Registry
Editor
Version
