What are the Registry values after you log off/log on, or reboot?

Hi Doug,

I checked Terminal Services and its already set to STARTED and MANUAL i went ahead and changed it to automatic but i'm still having the same problem in fact i just noticed that the problem exists if i just log off my user i dont necesarrily have to shut the pc down as soon as i log back in the fast user switching option is again disabled... it however does not disables itself if i switch user only when i log off...

like i mentioned before it seems that for some reason that particular setting isnt being saved algon with everything else...

any other ideas?

by the way thanks for your help...

enrique

Additionally, when this happens, click Start, Run and enter SERVICES.MSC

Re: Fast User switching option disables at startup

Look in the right pane for Terminal Services. This service should be set to Started and Manual. If not, double click it and change the startup type and start the service. You can also set it to Automatic startup, if desired. It won't hurt anything.

Hi Doug,

AllowMultipleTSSessions is set to 0x00000001(1)  
LogonType is also set to 0x00000001(1)

is this ok?

"Doug Knox MS-MVP" wrote:

Click Start, Run and enter REGEDIT Go to:

HKEY\_LOCAL\_MACHINE\SOFTWARE\Microsoft\Windows  
NT\CurrentVersion\Winlogon

Re: Fast User switching option disables at startup

In the right pane, locate  
AllowMultipleTSSessions and LogonType.  
Both of these values should be set to 1.

Hi, i need some help, i am  
using a WMCE PC and an  
xbox as an extender, the  
probelm i am having is that  
whenever i restart my pc the  
fast user switching  
option is disabled when  
windows starts and i have to  
manually go into the  
control panel and re-enable  
it.

for some reason wondows is  
not saving that setting does  
anyone know what i  
can do to correct this?
