No need to apologize -- we'd all like to help, but don't have a magic cache of drivers :)

Does ION have any kind of forum?

My apologies. I was simply trying to contact someone who might be able to help i.e. could answer my question or give advice.

Hi

I have recently purchased an ION iTTUSB turntable from Firebox. When I plug the device into the computer it is detected as a 'USB audio codec' by Windows XP Media Edition (fully patched but I'm not sure that is relevant).

The software CDs supplied contain copies of Audacity but there is no relevant driver and I cannot find one on my Windows CD or the web.

Re: Driver for ION iTTUSB turntable

Having initially contacted ION technical support in the UK
(I'm in the
UK
:)
I eventually contacted their support in the US and was told
that this
was
a
known issue and I needed to contact you as this driver was
not included
in
the XP Media Edition.

Any help you can give would be greatly appreciated as this
issue
(experience) has been outstanding for 2 weeks now.

Many Thanks

MJ

(Martin Elliot)

Who exactly are you trying to contact? This is a peer-to-peer support
group
and not monitored or supported by Microsoft. We wouldn't have any
drivers.

Tom
