To access/view the network settings on your Xbox 360, do the following:

1. From the Xbox Dashboard, move to the System section.
2. Select Network Settings.
3. Select Edit Settings. You can view the network settings on the Edit Settings screen in the Xbox Dashboard

Please post the contents of your DvcConn.log file from c:\windows. Also, please post the IP addresses of your PC and Xbox as well as details regarding how your network is configured (wired/wireless, how your PC and Xbox physically connect to the network, makes/models of routers/switches/hubs, etc.).

removed mcafee  
firewall(found out i cant  
have it installed and to  
360)  
tuned  
on fast user switching,  
turned on welcome screen,  
turned on remote  
user  
connection. when to fire  
wall and Under Programs  
and Services, the  
following  
items were checked:  
Media Center  
(c:\windows\ehome\ehshell.exe)  
Media Center Extender  
Service (UDP 3776)  
Remote Media Center  
Experience (TCP3390)  
UPnP Framework  
and still nothing
