Also...how can I tell which version of sonic I have?...I have am using  
2005  
edition of media center.

When I go to media center and select create cd/dvd the program will not run.  
I have not removed any programs or installed any updates except the ones we get from microsoft updates. I have a dvd/cd-rw drive and have the recording tab under properties checked to enable cd recording. I also have a dvd-rw drive where under the recording tab it is unselected. I cannot have both selected at the same time. any suggestions out there? thanks
