Thanks I'll give that a shot, failing that I am downloading the Vista RC1 64-Bit will that work with my Xbox360 instead?

Thanks,

Hi

Looks like your .net Framework is totally botched. Fortunately, it can be fixed.

Follow the instructions at this blog to fix it

What to do if Media Center Extender for Xbox 360 setup crashes <http://blogs.msdn.com/astebner/archive/2005/12/06/500801.aspx>

Thanks I changed the key to say 3.0 but when I run the software I get this error issue:

Re: Trying to install Media Center Extender for Xbox 360 but it will only install Connect

See the end of this message for details on invoking  
just-in-time (JIT) debugging instead of this dialog box.

\*\*\*\*\* JIT Debugging \*\*\*\*\*

To enable just in time (JIT) debugging, the config file for this application or machine (machine.config) must have the jitDebugging value set in the system.windows.forms section. The application must also be compiled with debugging enabled.

For example:

```
<configuration>  
<system.windows.forms jitDebugging="true" />  
</configuration>
```

When JIT debugging is enabled, any unhandled exception will be sent to the JIT debugger registered on the machine rather than being handled by this dialog.

Re: Trying to install Media Center Extender for Xbox 360 but it will only install Connect

==

I clicked ok and then Next, it then dies saying you have a problem with the install. If its any help, I did manually install extender by hunting around in the temp file that was created. It installed but it now wont let me uninstall it as it errors with:

DvcConn.exe

Process id=0xbec (3052), Thread id = 0x3b8 (952)

On Oct 18, 6:09 pm, "Jason Tsang" <jason-online...@xxxxxxxxxxxx> wrote:

Can you confirm that you have Media Center 2005?

You can do so by following these instructions.

How to determine the version of Media Center that you are running <http://support.microsoft.com/default.aspx?scid=kb:en-us:837707>

If you do have Media Center 2005, then it is likely that the IDENT value in the registry for MCE2005 is incorrect, causing the error you are encountering. To fix this... do the following.

1. Open up your registry using regedit.exe
2. Find the sub-key  
HKLM\Software\Microsoft\Windows\CurrentVersion\Media Center
3. Check the Ident value, it should be set to 3.0 when you install Update Rollup 2
4. Install the Full Xbox 360 software (available at <http://download.microsoft.com/download/2/8/5/28521E1E-120E-4D05-8310-...>)

After installing Update Rollup 2, the Ident value should be updated to  
4.0
