You caught my mistake, my old brain saw WORDS32 not WORDS2. Thanks for your help!!

"Doug Knox – [MS-MVP]" wrote:

Hi Jon,

Other than ensuring that you're typing in the command line properly.
CONTROL USERPASSWORDS gets you the standard User Accounts
window. CONTROL
USERPASSWORDS2 gets the older style user management dialog.

You can also use TweakUI for Windows XP to set the autologon
information.

TweakUI is available from

<http://www.microsoft.com/windowsxp/pro/downloads/powertoys.asp> (SP1
and
later systems)

Re: windows log-on screen

<http://www.microsoft.com/windowsxp/home/downloads/powertoys.asp> (Pre SP1 systems)
