Hallo

"CSM1" wrote:

Ok see if I understand what  
you want to do.

You have an old hard drive  
that is too small to hold all  
your music  
files.

So you bought a 500 GB  
hard drive and want to  
transfer your music to  
the  
new

Re: New hard drive

hard drive.

What I do not understand is why you want to transfer your Operating System to the new drive.

In the first place you can not do that without special software or to reinstall the OS and programs.

You can however keep your old hard drive and just add the new drive into the computer. You can then store your music files on the much larger drive and still run your system as before.

The new drive would show another drive letter in My Computer and Windows Explorer, MCE can be configured to use the new drive for recorded TV and Videos. It is just change a setting in MCE.

Thank you  
yes I would  
like to put

Re: New hard drive

the  
os(window  
media  
center ) on  
the  
new  
drive cut  
and paste  
does not  
work when  
I tried to  
delete  
music on  
the  
old  
drive it also  
delete the  
music on  
the new  
drive so  
how do I  
reinstall  
Windows  
media  
center  
on the new  
drive I need  
step by step  
instructions  
thank you  
thank  
you  
thank  
you thank  
you

Not  
really  
sure  
what  
you  
are  
asking,  
do  
you  
want  
to  
put  
the  
OS

Re: New hard drive

(Window  
Media  
Center)  
on  
the  
new  
drive?  
If  
so,  
you  
need  
to  
reinstall  
it  
to  
that  
drive.

If  
you  
just  
want  
to  
transfer  
your  
music  
to  
the  
new  
drive,  
just  
cut  
and  
paste,  
or  
safer,  
copy  
it  
first,  
make  
sure  
it's  
all  
there  
and  
playable,  
then  
delete  
it.

Re: New hard drive

It makes it  
hard  
to find the new comments.

I do not understand why or even how you managed to delete  
the files you  
copied from the old location from the new location at the  
same time you  
deleted the files at the old location.

The correct way is Open Windows Explorer. Navigate to the  
old location,  
select the folder(s), and files you want to copy. Then on the  
Edit menu,  
Copy (or you press Ctrl+C). Navigate to the new location,  
Edit menu,  
Paste.  
(or you press Ctrl+V).

That will make copies of the files. Be sure that where you go  
to delete  
to  
old files that you do not have to newly copied file selected,  
press  
Delete.  
That will move the deleted files into the Recycle bin (if there  
is enough  
room).

If you use Cut, that copies the files to the new location and  
deletes  
them  
from the old location in the same action. It is safer to Copy  
then delete  
after you have confirmed the files transferred OK.

-- hello Carl thank you for the help I did make a mistake I  
do not want  
to move the operating system I've want to move the program  
Microsoft  
media I deleted all the music and started over OK number 1  
The Old hard  
drive is C and the new hard drive j O K. I went to the  
programs and right  
click Microsoft media and in the drop-down box i click sand  
too J. OK  
went to my computer and click J. OK Microsoft media was

Re: New hard drive

owned J. OK went  
back and unplugged J O K. then I went back to c O K.  
clicked on Microsoft  
media and erased all the music now that is no music on c O  
K. went back  
and plugged in J. OK went back to my monitor and click on  
J. now all the  
music that I had on J. at first it deleted I do not understand if  
J. was  
unplugged when I deleted the music on C. how was the  
music also deleted  
only J. when I plugged J. >

Hello, Wallace,

English must not be your first language.

When you go to reply, go to the bottom of the message press the Enter key,  
that will get you started at the first line after the message.

Press the Enter key to make paragraphs to make the message easier to read.  
Break up long sentences into smaller sentences.

Sorry for the lesson in ethics. It is hard to understand what you are trying  
to say.

I frankly do not know what happened, It is not something I have ever heard  
of.

When you use the term "Microsoft media" do you mean Microsoft Media Center  
Edition 2005?

If so, that is a part of the Operating System. It can not be moved. It can  
only be destroyed.

I think you need to find a Computer Service Technician where you live.  
You need to explain to that Technician exactly what you wish to do, let  
him/her teach you what needs to be done.

And find a Technician that speaks your first language.
