i asked Hauppauge for a date on this fix.

If you would like to request to, simple send to
techsupport@xxxxxxxxxxxxxx the more the merrier

"Rod" wrote:

,Have same problem. found this but not promising.

http://www.hauppauge.com/pages/faq/support_faq_hvr1600.html#10

It says:

"Note: If you are running Vista 64 bit and have 4GB of memory or higher installed in the system, you will need to reduce the memory in the system to remedy this problem. This is a known OS issue that is currently being looked into."

did anyone find a fix??

"jazzzz" wrote:

I have the same prob in Vista 32 ultimate.
I have found that minimizing and maximizing the media center window sorts out the problem (for a while)...I too have not found a solution. If you change the codec using vmcd.exe and decchekc it might help...but when I did that I had problems with DVD playback.

time on your
Hybrid 950 tuner card.

If running MCE2005 you can not configure the ATSC tuner
unless you have a
separate NTSC tuner configured.

The 950 card does not have a hardware encoder chip and I
don't know if there
is a MC compatible driver for its software encoder.

I'm having the exact same problem, any
suggested solutions at this point?
I've tried re-installing the 950's drivers and
my graphics card drivers
(it's
an NVIDIA GeForce 8600M GS). The video
appears in WinTV but not in MCE.

Thanks in advance,
Frank

"JW" wrote:

I have seen reports of this
problem on 4GB Vista 64
systems using a
PVR150
card or one of the other
cards that uses this tuner
such as the PVR 500
or
the 1600. I have not,
however, ever seen a
definitive solution posted.

Thanks for
the
response,

I tried 3.4B
drivers, and
3.1G drivers
from

Re: Vista 64 Live TV Green Screen.

Hauppauge.

<http://www.hauppauge.com/pages/support/vista.html>

The encoder
loaded with
3.4B was
2.0.25022
The encoder
loaded with
3.1G was
2.0.25102

Recording
Live TV
only plays
back the
green
screen. I
can play
back
the
sample
movies with
out any
problems.

I am just
using the
graphics in
the G33
chipset with
a
7.14.10.1268
driver.
