what in the world is going on these days in the world of advertising?  
I didn't know to go with print advertising or online?  
So at the end of the day I decided to go with <http://www.atomicseo.net>  
Atomic SEO. They let me know about all the newer seo services vrs old  
school stuff like article submissions, instead they mentioned social  
bookmarking, and forum and blog posting.. So does that sound cool  
because they actually told me my competitors entire PPC campaign so I  
literally had some over night success seeing that I was able to cut  
into my competitions target audience over night. lol  
So I think they have a quote page where you can enter your competitors  
url's here <http://atomicseo.net/seo-free-report.php.htm> Just make  
sure you ask them about there competitor PPC analysis. Super Cool  
Highly recommend.

.
