There is no setting that is directly available to set the time zone in group policy. But this can be done with a script set through a group policy linked to the domain/OU. Timezone.exe in the Windows 2003 resource kit can be used in the script.

See the related links:

Timezone.exe can be downloaded from:

<http://www.microsoft.com/downloads/details.aspx?FamilyID=9d467a69-57ff-4ae7-96ee-b18c4790cffd&DisplayLang=en>

The link below provides information on how to script the timezone.exe. Please see the section "Use the Daylight Time Update Utility (Timezone.exe)"

<http://support.microsoft.com/default.aspx?scid=kb:en-us:317211>

Here is the link that helps to change the time zone using Visual Basic:

<http://support.microsoft.com/default.aspx?scid=kb:EN-US:221542>
