Use the Delegation of Control Wizard, and delegate the permission to create only computer objects within the specific OU you're concerned with. "Add workstations to domain" will not restrict the user to only a particular OU.

Here's a walk-through from the MS site to get you started:

<http://www.microsoft.com/technet/prodtechnol/windowsserver2003/technologies/directory/activedirectory/stepbystep/>
