Matthew,

Just a shot in the dark:

<http://www.eventid.net/display.asp?eventid=13&eventno=2719&source=AutoEnrollment&phase=1>

I posted this in General with no response so I thought I might try here as well...

I have a 2003 server that keeps getting the error –

Event Type: Error
Event Source: AutoEnrollment
Event Category: None
Event ID: 13
Date: 2/1/2006
Time: 11:28:51 AM
User: N/A
Computer: xxxxxxxx
Description:
Automatic certificate enrollment for local system failed to enroll for one Domain Controller certificate (0x80070005). Access is denied.

For more information, see Help and Support Center at
<http://go.microsoft.com/fwlink/events.asp>.

I read in a couple places to try "certutil –setreg SetupStatus –SETUP_DCOM_SECURITY_UPDATED_FLAG". I tried that and it produced the error –

Re: Autoenrollment error

CertUtil: -setreg command FAILED: 0x80070002 (WIN32: 2)

CertUtil: The system cannot find the file specified.

Does anyone have a suggestion on where to go from here?

Thanks!
