Hi,

So my understanding is that you are able to log on with the Built In "Administrator" account, but if you try to log on as a user who is a member of the "Domain Admins" group he is unable to logon.

Going by this understanding I would want a Whoami dump of the user. If the user cannot log on to DC, try logging on to a client workstation and then run the following from the cmd

Whoami /all >whoami.txt

You can download the Whoami.exe from the following link

<http://www.microsoft.com/downloads/details.aspx?FamilyID=3e89879d-6c0b-4f92-96c4-1016c187d429&DisplayL>

Please send the dump to me in mail as the reply would be quicker then.

AJ Sarkaria

Several Login attempt wrote:

if i logon as domain Admin the error message is:

"Unable to log you on because of an authentication restriction". There is no error code for that. even i checked the event viewer log. But i can logon as Administrator Account.

Trust this clarify.

Hi,

Re: Domain admin login problem

Question for you: How can you logon to the DC as a Local Admin? There is no Local Admin on a DC...

Also your question is no clear. What I understand is that You are not able to logon on do DC as a Domain Admin? If yes then send me a mail with the error message that you get along with the details of actually what is happening...

Thanks

AJ

hi
i checked all GPO & Local Policies & Event Viewer of Backup DC & all Client machines. Even i tried to create a new user, the same error message.
Pls help

No i don't have enterprise
admin rights bcaz my n/w
structure is as:

One parent Domain in
remote pertaining somany
DCs in various location.. In
that, my Additional DC
gives the Problem. I
contacted my parent DC
Admin

Re: Domain admin login problem

person, the same problem is also arised in some of the other DCs.

So i want a clear solutio at the earliest. Pls
Rajaguru

we
installed
win
2k3
server
as
a
primary
&
additional
DCs.
if
the
Domain
admin
login
account
is
not
permitted
to
the
Additional
DC.

Re: Domain admin login problem

I
checked
all
Local
&
domain
Controller,
domain
Security
Policies
&
etc.

If
i
login
as
Local
Admin,
the
additional
DC
accept.
if
i
login
as
Domain
Admin,
the
Additional
DC
Shows
the
error
message
as:

"Unable
to
logon,
because
the
account
restricted".

How
to
solve
the
problem?

Re: Domain admin login problem

if
anyone
pls
help
me.
