Hi,

The filter clause should be enclosed in parenthesis, not quotes. The quotes should enclose the distinguished name of the group. Try:

```
csvde -f report.txt -r (memberOf="cn=MyList,ou=Sales,dc=MyDomain,dc=com") -l  
sAMAccountName,displayName,mail
```

"Ammar" <Ammar@xxxxxxxxxxxxxxxxxxxxxxxx> wrote in message
news:1EDD1A0B-320A-4159-880A-7C8DFB2BA062@xxxxxxxxxxxxxxxx

but dear im using this command

```
csvde -f report.txt -r "memberOf=cn=MyList,ou=Sales,dc=MyDomain,dc=com" -l  
sAMAccountName,displayName,mail
```

which already have " " ...so if i use " " in the middle,it will not work

```
when trying to export some group membership by using  
csvde ,i got no  
entries  
found , i think that this is because the group name contains  
double  
spaces  
and dashes like ( sales in departement) . and like this ( Sales  
in-my
```

Re: Double Spaces in Group Name prevents export!!

company)

So how can i solve this

Hi,

Try enclosing the group name in quotes ("). For example:

```
csvde -f report.txt -r (cn="Sales in department")
```

If you really meant to specify a leading space, I find that leading spaces are ignored.
