– This computer was not able to set up a secure session with a domain controller in domain XXXX due to the following:

There are currently no logon servers available to service the logon request.

This may lead to authentication problems. Make sure that this computer is connected to the network. If the problem persists, please contact your domain administrator.

Why after restar everything is ok. I add and remove this
computer from
domain
before, but nothig change.

Hello
The result of nediag /v is:

DC discovery test. :
: Failed

Find DC in domain 'xxxx':
[FATAL] Cannot find DC
in domain 'xxxx'.
[ERROR_NO_SUCH_DOMAIN]

DC list test :
Failed
'xxxx': Cannot find DC to
get DC list from [test
skipped].
List of DCs in Domain
'xxxx':

Re: Disapearing DC

Trust relationship test.

: Failed

Test to ensure DomainSid of domain 'xxxxxx' is correct.

'xxxxx': Cannot find DC to get DC list from [test skipped].

Secure channel for domain 'xxxx' is to '\\zzzz'.

Kerberos test. : Skipped

Skipped

'xxxx': Cannot find DC to get DC list from [test skipped].

LDAP test. : Failed

Failed

Cannot find DC to run LDAP tests on. The error occurred was: The specified domain either does not exist or could not be contacted.

Find DC in domain

'xxxxxx':

[WARNING] Cannot find DC in domain 'xxxx'.

[ERROR_NO_SUCH_DOMAIN]

But after restart all of this failed test are ok. I can see

the

sysvol

and

others catalogs on DC

"Paul Bergson" wrote:

run netdiag
from the
workstation
see if you

Re: Disapearing DC

recieve any
errors.

netdiag /v /l
/test:failing_dc_name

Replace
failing_dc_name
with the
name of the
dc in this
servers
site.

Re: Disapearing DC

I've
got
Windows
2003
server
standard
ed
r2
with
all
service
packs.
After
restart
this
member
server
I
can
see
all
objects
in
AD,
I
can
add
domain
user
to
local
group,
but
after
a
while
I
can't
see
any
AD
objects.
Netdiag
reports
error
that
it
can't
find
DC.
In

Re: Disapearing DC

event
viewer
are
some
errors
like
this:
-
This
computer
was
not
able
to
set
up
a
secure
session
with
a
domain
controller
in
domain
XXXX
due
to
the
following:
There
are
currently
no
logon
servers
available
to
service
the
logon
request.
This
may
lead
to
authentication
problems.
Make
sure
that

Re: Disapearing DC

this
computer
is
connected
to
the
network.
If
the
problem
persists,
please
contact
your
domain
administrator.

My
AD
servers
are
windows
server
2000
with
all
sp's.

Can
anyone
help
me
with
this.

Paul.
