If you look under the Owner tab the user does not have ownership
Administrators have the ownership.

Assuming that WSNTTest is your test user:

Don't go to Ownership tab... Go to Permissions Advance -> then select the
user WSNTTest -> edit -> and check if the user has TakeOwnership permissions.

I hope that the information above helps you

First I created the Folder then shared the folder and set share
permissions
on Everyone to Full.
Edited the Security on the folder and removed inheritable permissions and
deleted all entries. Added the following user accounts/permissions:

Administrators/Full Control, This folder, subfolder and files. <not
inherited>
Creator Owner/Full Control, Subfolders and files only <not inherited>
Domain Users/List Folder/Read Data, Create Folders/Append Data, This
folder
only <not inherited>
System/Full Control, This folder, subfolders and files <not inherited>

In ADUC 2003 I went to the users profile tab and selected U: for the drive
letter and \\S98234\New Folder\%Username% for the path.

Re: Home Folder Owner

The users folder is created and security assigned to the folder.

Groups or users assigned:

Administrators/Full Control,This folder, subfolder and files <not inherited>

WSNTest/Full Control,This folder, subfolder and files <not inherited>

Administrators/Full Control,This folder, subfolder and files <E:\New Folder\>

Creator Owner/Full Control, Subfolders and files only <E:\New Folder\>

System/Full Control, This folder, subfolders and files <E:\New Folder\>

If you look under the Owner tab the user does not have ownership

Administrators have the ownership.

If you do this same folder creation with ADUC 2000 the folder ownership is correct.

What am I doing wrong? Do I have something wrong in the permissions?

"Jorge Silva" wrote:

This works...

can you tell me step by step how are you configuring the Home Profile and the Server share?

Ok...I tried that with the same results.

"Jorge Silva" wrote:

on the server share give everyone full access on Share permissions and

NFS

full permissions to system and authenticated users then try again.

Jorge,
Yes, I do create the home
folders with the UNC path.
The strange
thing
is
that the folder ownership is
Administrators when
created with ADUC
2003
and
the folder owner is the user
when you create it with
ADUC 2000. I
have
gone
through the KB articles on
share setup and
homefolders. I have also
looked
at
KB 817009. Still no luck.

Re: Home Folder Owner

a
home
folder
in
ADUC
2003
that
the
folder
owner
is
Administrators
but
when
you
create
the
same
home
folder
on
the
same
share
with
ADUC
2000
it
assigns
the
folder
owner
as
the
user?

How do you
create the
Home
folder do
you setup
the home
folder
under
user
properties
like:
\\server\share\%username%
check:

Has
anyone
had
a
problem
when
they
create
a
home
folder
in
ADUC
2003
that
the
folder
owner
is
Administrators
but
when
you
create
the
same
home
folder

Re: Home Folder Owner

on
the
same
share
with
ADUC
2000
it
assigns
the
folder
owner
as
the
user?(The
way
I
think
it
should
be.)
The
user
can
create
folders
and
files
underneath
there
home
folder
and
they
are
listed
as
the
owner.
I
have
looked
at
MS
KB
artical
817009
and
and
search
the
