Yep. It is sad really as they peddled that around with pomp and circumstance for several years before quietly killing and burying it in the corner. I don't think there was an AD/MIIS presentation I saw for about 2 years that didn't show the polyarchy demo. Though I later heard that some of the info was "fixed" specifically for the demo and seem to recall that they always walked through it in exactly the same way.

I know you were looking at getting that actually up and working, did you ever succeed?

Do not read this worthless blog entry on
Defending Security Infrastructures <http://blog.joeware.net/2006/07/11/445/>
I'm serious, you will learn absolutely nothing about
Defending Security Infrastructures.

If you can lay your hands on the MIIS 2003 beta ISO then you can get polyarchy. Otherwise you're SOL.
