Hi Newsgoup, i have a question.
How can i list all Clobal Catalog server in a Domain.
Can you help me.
Thanks Marco

If you have NOT already installed the Windows Server Support Tools, install them from the \SUPPORT\TOOLS\SUPTOOLS.MSI file of the Windows Server CD-ROM.

Remove the serialization from the following and save it as IS_GC.BAT. Run IS_GC.BAT

```
01 @echo off
02 setlocal
03 set get=netdom QUERY /DOMAIN:%USERDNSDOMAIN% DC
04 set no=The command completed successfully.
05 for /f "Skip=1 Tokens=*" %%a in ("%get% ^|find /V "%no%") do (
06 call :isgc %%a
07 )
08 endlocal
09 goto :EOF
10 :isgc
11 set GC=N
12 for /f "Tokens=*" %%g in ('repadmin /showreps %1 ^|findstr /l /i /C:"DC Options: IS_GC") do (
13 set GC=Y
14 )
15 if "%GC%" EQU "Y" @echo %1
```
