How are you trying to import that... Usually you use ldifde to load schema mods but that isn't LDIF format below...

Juan wrote:

I am trying to import an file containing definitions of attributes and classes. I have installed ADAM to import it, but when I load it i get an error:

[In spanish]

Error (Exception) al cargar el esquema desde "Archivo LDIF": Error al cargar esquema: astUsername: La referencia SUP del atributo (name) no está apuntando a ningún atributo existente. No es posible continuar.

[In english]

Error (Exception) loading schema from "LDIF File": Error loading schema: astUsername: Reference SUP of attribute (name) is not referencing any existent attribute. Can not continue.

This is an extract of the file:

attributetype (1.3.6.1.4.1.23935.5.2.1.1.1 NAME 'astUsername'
DESC "
SUP name)

Re: Importing schema file

Any idea of the error? Is there any other way to load an schema file into AD?

Thanks in advance from Spain.
