hello,

no, it does not. All you have to set up is a two way trust between domains. Install ADMT V3 on the target domain.

Just take care, SBS is a bit special..

regards,

Gort a écrit :

my question is when you are using the ADMT does the new DC need to be installed as a new DC in an existing domain?

what I need to do is migrate from an existing server 2000 Ad domain to a windows 2003 SBS.

.
